DETAILED ACTION

Election/Restrictions/Lack of Unity of Invention

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 16-18, drawn to an undulated-wall honeycomb structure.

Group II, claim(s) 12-15, drawn to a fine particle removing filter.

Group III, claim(s) 19-23, drawn to an exhaust gas purification catalytic converter.

Group IV, claim(s) 24, 27, drawn to an exhaust gas purification system.

Group V, claim(s) 25, 34 drawn to another exhaust gas purification system.

Group VI, claim(s) 26, drawn to a fuel tank evaporation system.

Group VII, claim(s) 28, drawn to a fuel cell system.

Group VIII, claim(s) 29, drawn to a sandwich panel.

Group IX, claim(s) 30-33, 35, drawn to a method for manufacturing an undulated-wall honeycomb structure.

2. The inventions listed as Groups IX and I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group IX does not require any structural feature of groups I-VIII.

Art Unit: 1764

Regarding groups I-VIII, the JP 10-59784 and JP 61-068141 which have been denoted as an “X” reference in the applicants’ search report for their parent application, PCT/JP00/05862, are evidences that the “special technical feature” common to the claims of groups does not provide either a novel or an unobvious contribution over the prior art. Therefore, there is a lack of unity of invention between the claims of groups I-VIII.

3. If indeed Applicants elect Group IX, claims 30-33, 35, a further restriction is required because the claims are directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1. Claims 30-32, 35.

Species 2. Claim 33.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1764

4. The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species 1 requires a back plate with holes while species 2 requires corrugated metal foils.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
